

REVIEW OF WALESI IP NETWORK AND CYBER SECURITY

Walesi Pte Limited operates a nationwide digital television platform and associated network infrastructure across Fiji. Walesi is seeking a qualified vendor to conduct a comprehensive review of its IP network and cybersecurity posture.

1. Objectives

The primary objective of this engagement is to assess, enhance, and secure Walesi's existing IP network infrastructure and implement robust cybersecurity controls in line with international best practices.

2. Scope of Review

The successful bidder will be required to undertake the following:

- Cybersecurity Implementation.
- IP Network Review & Upgrade.

3. Deliverables

The vendor is expected to provide the following:

- Comprehensive audit and assessment reports.
- Detailed implementation plan, including milestones and timelines.
- Updated and standardized IP network diagrams.
- Inventory list of all tools/software deployed, including licensing information.
- User and administrator technical documentation.
- Hands-on training sessions for Walesi's IT staff.
- Final project report with analysis, findings, and forward-looking recommendations.

Interested bidders must include the following in their proposal:

- Company profile detailing years of experience in cybersecurity and IP network consulting.
- Relevant industry certifications (e.g., CISSP, CISM, CompTIA Security+, Cisco, Microsoft).
- References from at least three (3) similar projects completed in the last five years.
- Curriculum Vitae (CV) or resumes of the personnel who will be assigned to the project.
